Alex Nayberg	2565392973	Tate, Natalie	comment field	2/5/2015	10.00

This custom report displays all customer account adjustments made through Store Operations Manager. The report can be sorted and filtered by Cashier, Account#, Customer, Adjustment Date, and Amount of Adjustment. This is the same information as shown on the Account Information tab of the Customer Properties window, but showing all customer adjustments in one window. An important tool for researching an account's non-transaction activity.
