This custom report expands on the RMS Customer List Report, with all address information including email. The custom text, date and number fields are also available.

We added a special "Custom Date1 Month" column for RMS Users who want to sort and filter the report by month. For example, if you want to reach out to all customers who birthday is in November, then enter the birthday in Custom Date 1 field. The report will display the month number, in this case 11, and you can sort or filter by the month number.
